# ONSITE INSPECTION & TESTING

We have the capability to inspect your lifting and hydraulic equipment at our premises or at your facility. We offer in house as well as mobile load testing. Hoists are preferably serviced at our workshop as they are thoroughly disassembled, inspected and cleaned before being reassembled and proof loaded on our in-house 20T hydraulic test bed.

## REPAIR & SERVICE

**Before:** Damaged, leaking cylinder.

**After:** Refurbished, load tested cylinder.

## TURNKEY ENGINEERING

From concept development to prototype to engineering certification, fabrication, trialling and final handover training, we have it covered.
